Summary of reasons
for classification:

The DVD *ALS Video #22 Featuring Joanne & Trisha* is classified as:
Objectionable.

The DVD depicts two young women being filmed during a sexually explicit photo shoot. The primary focus is on the sexual display of her genitals, masturbation, and penetration with fingers, sex toys and other objects. Several sequences in the DVD depict a model urinating on command for the camera. By depicting the use of urine in association with sexual conduct in a manner and context that is intended to be sexually titillating to viewers, the DVD promotes and supports the use of urine in association with sexual conduct in terms of s3(2)(d) of the Films, Videos, and Publications Classification Act 1993.

Excisions to remove the sequences involving the use of urine in association with sexual conduct could not be offered in this instance because there is no authorised distributor for the DVD, and the owner has forfeited their right to the DVD. Consequently the publication is deemed objectionable.

The Classification Office has considered the effects of the Bill of Rights on the application of the classification criteria. The classification of this publication interferes with the freedom of expression, but this is an outcome that is consistent with Parliament's intention that publications that promote and support the use of urine in association with sexual conduct are banned.
